

Construction & Furnishing

Build your skills in carpentry at WideBay TAFE!

These programs will help you develop the techniques and knowledge to construct a career in the building industry. The programs offer much more than trade skills; they also cover critical industry requirements such as estimation, surveying, cost control, plan interpretation, measurement and site supervision. There are also specialised topics such as low-rise buildings and light steel structures.

The nationally recognised qualifications mean that you will be able to work anywhere in Australia. So nail your employment as a carpenter or builder! Enrol with WideBay TAFE today!

Certificate IV in Building (CNBU1012)

rpl fd

Construct your career in the building industry! This program is the first level in the nationally recognised advanced building studies group of programs for the built environment disciplines, and covers building theory and practice related to low rise buildings and associated light steel structures. You will develop specialist skills and knowledge in such areas as plan interpretation, drafting, quantities take-off, estimating, scheduling, construction technology, occupational health and safety, site supervision, surveying, cost control and business management.

Delivery Mode: Off Campus

Program Intake: Rolling Start

Careers: Building works supervisor, estimator, technical or para-professional studies.

Course in Preparation for Owner Builder Permit (39219QLD)

fd

If you're thinking of applying for an Owner Builder permit, do you know enough about costing materials, certifying plans, obtaining documentation and approvals plus much more? Managing a building project calls for a great many technical skills and legal responsibilities. This course gives you the grounding you need to apply for an Owner Builder Permit from the Queensland Building Services Authority.

Delivery Mode: Off Campus
