

Water Industry

If you think water is more than a drop in the ocean, then a career in the water industry could be for you.

With the supply and quality of water becoming a bigger issue every year, there is a critical need to develop the next generation of water industry professionals. WideBay TAFE has worked closely with industry to develop nationally-recognised qualifications for people involved, or wanting to be involved, in the management of water, bulk water, and wastewater.

Don't let your career in the water industry go down the drain! Enrol at WideBay TAFE today and get into the flow of your water qualification.

Certificate II in Water Industry Operations - Water Treatment or Waste Water Treatment

(NWP20101)

If you work as a plant operator for a water, or waste water treatment facility, this nationally recognised program will give you the qualification to competently and safely operate a treatment plant. Delivered online, the program allows you to study in your own time at your own convenience with full support from a teacher with up-to-date industry experience. It offers the best opportunity to accelerate through the learning and assessment activities and receive your qualification faster. You will need access to the internet, but require only minimal computer skills. The program is extremely practical, relevant and enjoyable, and focuses on the day-to-day activities of working in a water treatment plant. After completing a Certificate II, you can continue to Certificate III level.

Delivery Mode: Off Campus

Program Intake: Semester 1, Semester 2, Rolling Start

Entry Requirements: Please speak to a Customer Care Officer about entry requirements.

Careers: Water Treatment Plant Supervisor/Manager, Dam Supervisor/Water Operations Officer.

Certificate III in Water Industry Operations - Water Treatment or Waste Water Treatment

(NWP30101)
